

# Size demo of the chordbars package

S. Kramm

Package home page: <https://github.com/skramm/chordbars>

This is a size demo for the L<sup>A</sup>T<sub>E</sub>Xchordbars package, provided to be able to have a quick glance at what size choices can be done. It is build with the "article" class, using a default "12pt" font size and the "moresize" package <sup>1</sup>. See chordbars manual or source file for details.

Build on December 31, 2025.

## 1 - barsize=1.5

- Font=large

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=Large

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=LARGE

C	Dm7	Em7	FΔ
---	-----	-----	----

## 2 - barsize=2

- Font=LARGE

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=huge

C	Dm7	Em7	FΔ
---	-----	-----	----

<sup>1</sup>Without this additional package, and according to <https://www.sascha-frank.com/latex-font-size.html>, the \huge and \Huge sizes are both 25pt (the same!) when using the "12pt" article option. This is not the case when using "11pt" font size.

- Font=Huge

C	Dm7	Em7	FΔ
---	-----	-----	----

3 - barsize=2.5

- Font=LARGE

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=huge

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=Huge

C	Dm7	Em7	FΔ
---	-----	-----	----

4 - barsize=3

- Font=LARGE

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=huge

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=Huge

C	Dm7	Em7	FΔ
---	-----	-----	----

- Font=HUGE

C	Dm7	Em7	FΔ
---	-----	-----	----
